

## **RAMAGUNDAM FERTILIZERS AND CHEMICALS LIMITED**

### **PRESS NOTE (01.09.2023)**

#### **August - 2023 production announced by RFCL CGM Sudhir Kumar Jha!**

Ramagundam Fertilizers and Chemicals Limited has announced the production of August - 2023 products at the factory. Ramagundam Fertilizers and Chemicals Ltd. has started a factory in collaboration with central and state to meet the shortage of fertilizers in the country. On March 22, 2021, the factory started full production. Currently we are supplying Neem coated urea produced in the plant to Telangana, Andhra Pradesh, Karnataka, Maharashtra, Tamil Nadu, and Chhattisgarh states.

In August – 2023, the plant produced 118335.78 metric tonnes of urea. In this, we supplied 25708.55 metric tons to Telangana, 29208.96 metric tons to Andhra Pradesh, 33222.06 metric tons to Karnataka, 10846.35 metric tons to Maharashtra, 8177.76 metric tons to Chhattisgarh, and 11672.10 metric tons to Tamil Nadu.

On this occasion, Chief Executive Officer of RFCL congratulated the workers, employees and officials who played a vital role in achieving full production capacity of the company and production of 118335.78 metric tons. He also expressed special thanks to the state and district administrations and the Union Ministry of Fertilizers and Chemicals for supporting the organization.
